

江恩最重要的资金管理规则

1. Divide your capital into 10 equal parts and never risk more than 1/10th of your capital on any one trade.

将你的资本分成十等份，每次交易不要冒损失1/10以上资本的风险。

2. Always use stop loss orders to protect your trade and place it immediately after entering a position.

永远采用止损单来保护你的交易，在建立头寸后立即设定止损单。

3. Never overtrade by taking large positions. This would violate your capital rule. Remember "Safety first."

永远不要用大头寸（大仓位）来过度交易。这会违反你的资金规则，记住“安全第一”。

4. Never let a profit run into a loss. When the market moves in your favor and you have a profit that is double the amount of risk you were

willing to take, move your stop loss order so that you will have no loss of capital if hit.

不要让利润变为损失。当市场向你预期方向运动，并且利润超过了你所冒风险的二倍时，移动你的止损位，这样当市场触发你新设的止损单时，你将不会损失初始的资本金。

（译注：在这里引入“移动止损”的概念，即当价格对你有利，有了浮动利润时，顺着与你有利的趋势的方向，将止损位进行相应的调整，在欧元，瑞郎直盘币种里，常用的移动止损是波段的618移动。这条注解对理解第7条有帮助。）

5. When in doubt, stay out or get out.

心存疑虑时，观望或者出场。

6. Trade in active, liquid markets.

在活跃的，流动性中的市场中交易。

7. Don't close your trades without a good reason. Follow up the position with stop loss orders to protect your accumulating profits according to the rules.

没有好的理由，不要平仓。根据规则，用止损单来跟踪你的顺势仓位，以保护你不断积累的利润。

8. Accumulate a surplus of capital. This rule is very important. After you have made a series of successful trades, put some money into a surplus account to be used only in emergency or in times of panic.

积累盈利。这条规则很重要，当你取得了一系列交易的成功后，从中取出一些钱，放入盈利帐户，这笔钱只在紧急或恐慌的境况下动用。

9. Never average losing position. EVER. This is one of the worst mistakes a trader can make.

不要在亏损的头寸上摊低损失，永远不要！这是交易者犯下的最严重错误之一。

（译注：Averaging losing position，即中文的“摊低损失”，指的是在亏损的头寸上加码。）

10. Never get out of the market just because you have lost patience or get into a market because you are anxious from waiting.

不要因失去耐心而出市，不要因焦虑等待而入市。

11. Avoid taking small profits and large losses.

避免截断利润，让损失奔跑。

12. never cancel a stop loss order after you have placed it when entering a trade.

进入市场并设置止损单后，永远不要取消止损单。

13. Avoid trading too frequently, getting in and out too often.

避免过于频繁的交易，避免过于快速的进出。

（译注：T00一词表明交易者不要违反交易的波动节奏，在这里“T00”的言语指向很明显，日内交易者踏准波动节奏的频繁交易不违反此规则。）

14. Be just as willing to sell short as you are to buy long.

乐于作多，也要乐于做空。

15. Never change your position without a good reason based on set rules.

没有规于规则的良好理由，不要改变你的头寸。

16. Avoid increasing your trading activity after a long period of success or a series of profitable trades. Remember to accumulate a surplus and don't be tempted to increase your trading unit too quickly. Success can go to your head and has ruined many other wise good traders.

在长时间成功，或做了一系列利润丰厚的交易后，避免增加交易活动。累你的盈利，并且不要过于快速地增加交易仓位。胜利会冲昏你的头脑，并毁掉其他明智而良好的交易。
